Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's representative presented a distinction between Applicant's disclosure and that of Niki regarding wherein Applicant's disclosure is directed to the fan blowing during the abnormal state detecting and Niki teaches the abnormal state detection being stopped while the fan is operated. The Examiner indicated that this distinction did not appear to be recited in the claims, and suggested inserting language regarding driving the electric motor fan during the abnormal state detecting. Applicant's representative said he would consider the proposed amendments and provide follow up communication.
